### About

Cloud native computing uses an open source software stack to deploy applications as microservices, packaging each part into its own container, and dynamically orchestrating those containers to optimize resource utilization. The Cloud Native Computing Foundation (CNCF) hosts critical components ... see more

## Upcoming events

Two event cards are displayed side-by-side. The left card is for a session on Tuesday, July 9, 2024, at 9:00 AM, titled 'Cloud Native Live: Dumbing down developer platform consoles', with 5 attendees. The right card is for a session on Wednesday, July 10, 2024, at 9:00 AM, titled 'Cloud Native Live: Tetragon Kubernetes Policy Filtering', also with 5 attendees. Both cards feature a decorative header with three overlapping circles in shades of orange and red, and a blue button at the bottom labeled 'View' with a right-pointing arrow icon.
